As a courtesy, we will file insurance claims for you. It is important to note that your insurance coverage is a contract between you and your insurance company, not our office and your insurance company. This service is provided as a courtesy only and does not substitute for payment. Many insurance companies pay fixed allowances for certain procedures while many others pay a percentage of the charge. "Reasonable and Customary Fees" are determined by your insurance carrier and may vary greatly between carriers. **It is your responsibility to pay any deductible amount, co-insurance or any other balance not covered by your insurance company.**

AUTHORIZATION AND RELEASE: I authorize payment of insurance benefits directly to the chiropractor or chiropractic office. I authorize the doctor to release all information necessary to communicate with personal physicians and other healthcare providers and payers to secure the payment of benefits. I understand that I am responsible for all costs of chiropractic care, regardless of insurance coverage. I also understand that if I suspend or terminate my schedule of care as determined by my treating doctor, any fees for professional services will be immediately due and payable. I understand that interest is charged on overdue accounts at the annual rate of 16%.

The patient understands and agrees to allow this chiropractic office to use their Patient Health Information for the purpose of treatment, payment, healthcare operations, and coordination of care. We want you to know how your Patient Health Information is going to be used in this office and your rights concerning those records. If you would like to have a more detailed account of our policies and procedures concerning the privacy of your Patient Health Information we encourage you to read the HIPAA NOTICE that is available to you at the front desk before signing this consent. If there is anyone you do not want to receive your medical records, please inform our office.

FULK CHIROPRACTIC & ACUPUNCTURE, LLC - INFORMED CONSENT

The primary treatment used by doctors of chiropractic is the spinal manipulation, sometimes called spinal adjustment.

- **Chiropractic Informed Consent:**

  Chiropractors use their hands or a mechanical instrument to manipulate your joints. This may cause an audible "pop" or "click," much as you may have experienced when you "crack" your knuckles. You may feel or sense movement.

  As with any healthcare procedure, there are certain complications which may arise during chiropractic manipulation. Those complications include: fractures, disc injuries, dislocations, muscle strain, Horner's syndrome, diaphragmatic paralysis, cervical myelopathy and costovertebral strains and separations. Some types of manipulation of the neck have been associated with injuries to the arteries in the neck leading to or contributing to serious complications including stroke.

  Fractures are rare occurrences and generally result from some underlying weakness of the bone, which we check for during the taking of your history and during examination and X-ray. Stroke has been the subject of tremendous disagreement within and without the profession with one prominent authority saying that there is at most a one-in-a-million chance of such an outcome. Since even that risk should be avoided if possible, we employ tests in our examination which are designed to identify if you may be susceptible to that kind of injury. The other complications are also generally described as "rare."

  Remaining untreated allows the formation of adhesions and reduces mobility which sets up a pain reaction further reducing mobility. Over time, this process may complicate treatment making it more difficult to treat and less effective the longer it is postponed. The probability that non-treatment will complicate a later rehabilitation is very high.

- **Nutritional Informed Consent:**

  According to the Federal Food, Drug and Cosmetic Act, as amended, Section 201 (g) (1), the term “DRUG” is defined to mean: “Articles intended for use in the Diagnosis, Cure, Mitigation, Treatment or Prevention of disease.
  A vitamin is not a drug, NEITHER is a Mineral, Trace Element, Amino Acid, Herb, or Homeopathic Remedy. Although, a Vitamin, a Mineral, Trace Element, Amino Acid, or Herb, may have an effect on any disease process or symptoms, this does not mean that it can be misrepresented, or be classified as a drug by anyone. Therefore, please be advised that any suggested nutritional advice or dietary advise is not intended as any primary treatment and or therapy for any disease or particular bodily symptom.

  Nutritional counseling, vitamin recommendations, nutritional advice, and the adjunctive schedule of nutrition is provided solely to upgrade the quality of foods in the patient’s diet in order to supply good nutrition supporting the physiological and bio-mechanical processes of the human body. Nutritional advice and nutritional intake may also enhance the stabilization of the eight (8) chemical components of the VSC (Vertebral Subluxation Complex).

DO NOT SIGN UNTIL YOU HAVE READ AND UNDERSTAND THE ABOVE.
I have read or have had read to me and I understand the above information. I hereby give my consent to treatments recommended in this office.

BARNES THYROID TEST

This test was developed by Dr. Broda Barnes, M.D. and is a measurement of the underarm temperature to determine hypo and hyperthyroid states. The test is conducted by the patient in the a.m. before leaving bed - with the temperature being taken for 10 minutes. The test is invalidated if the patient expends any energy prior to taking the test - getting up for any reason, shaking down the thermometer, etc. It is important that the test be conducted for exactly 10 minutes, making the prior positioning of both the thermometer and a clock important.

PRE-MENSES FEMALES AND MENOPAUSAL FEMALES
Any two days during the month
FEMALES HAVING MENSTRUAL CYCLES
The 2nd and 3rd day of flow OR any 5 days in a row.
MALES
Any 2 days during the month.

You can do the following test at home to see if you may have a functional low thyroid. Use an oral thermometer or a digital one. When you use a digital one, place the probe under your arm for 5 minutes then turn your machine on; continue on for an additional 5 minutes. When using a regular one, shake down the night before.
